

TAS NETAcquirer

New business
transaction acquiring

tasgroup
empower your business

More and more business sectors (merchants) require access to new payments channels and expect to be able to offer their customers innovative payment systems and services in a timely manner. Thus, financial institutions must integrate the new payments channels in their existing Acquiring environments in order to provide these solutions to their merchants. Net Acquirer is the TAS solution that supports financial institutions and merchants in the integration of new payment channels for new value propositions. It manages transactions originating from traditional and innovative channels: ATMs, kiosks, physical and virtual POS terminals, Mobile, web, etc. Natively engineered for EMV, it enables EMV Cryptogram validation and script management and can capture transactions from different sources, not only EMV, but also magnetic stripe cards, flat-memory cards, Mobile SIM cards, etc.

Features

NETAcquirer is a transactional switch combining interfacing and routing capabilities with value added services. It provides the following functionalities:

- Acquiring from different devices: ATMs, physical and virtual POS terminals, Kiosks, PDAs, Mobile devices, etc.
- Chip EMV cards, Magnetic stripe cards, flat-memory cards, Secure Elements, Mobile SIM cards
- EMV Cryptogram validation and script management
- Connectivity with multiple acquiring points, physical and virtual
- Rule based routing to different authorisation centers
- Multiprotocol conversion, concentrating all transactions (payments and value added services) and connecting to one or more processing systems through a single interface
- Monitoring and reporting of transactions
- Ready for
 - Branded and private label cards
 - Terminal digital signature on Terminals
 - Loyalty applications
- Short time to market for implementation of new services
- PCI DSS compliant.
